Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8 and 13-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Brown (6101743).

3. Claims 8, 10, 13, 14, and 21-24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hardt (2002/0092203).

4. Claims 8, 9, 13-17, and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nacht (3009270).

5. Claims 8, 10, and 19-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Patterson (6176025).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hardt or Patterson.

Hardt or Patterson discloses the claimed invention except for the exact asker ratings of the gel. It would have been obvious to one having ordinary skill in the art at the time

Art Unit: 3728

the invention was made to use gels with the claimed asker ratings, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

1. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
